

Meeting Planning Committee

Norman B. Chutkan, MD, FACS, Program
Chair

Kenneth J. Schmidt, MD, Moderator

Program Description

The expected outcome of this activity is not only to increase and refine the depth of orthopaedic knowledge, techniques, and skills for the Arizona provider, but also to facilitate their application to the advancement of high-quality patient care.

Educational Objectives

At the conclusion, the attendee should be able to:

Review how a bone health clinician can complement a standard orthopaedic practice and improve patient outcomes.

Review the current FDA approved anti-obesity medicines and cite their safety and efficacy.

Determine treatment options for patients with acute lower back pain.

Cite ways to avoid complications while treating periprosthetic fractures.

Discuss and review new developments in Orthopaedic Surgery as demonstrated by case studies presented by Arizona Orthopaedic Residents in Training.

Maintain the focus of an orthopaedic practice on improved patient care rather than malpractice defense.

Conference Site

The conference will be held at the Black Canyon Conference Center at 9440 North 25th Avenue in Phoenix. Contact Patrice at 602.347.6901 if you need assistance with reserving a room at a local hotel.
